VaultFill Enterprise Security Policy

Version: 1.0.0
Classification: Highly Confidential
Date: February 11, 2026

1. Access Control

All systems utilize MFA (Multi-Factor Authentication) and are governed by the principle of least privilege.

2. Data Encryption

Data at rest is encrypted using AES-256. Data in transit is secured via TLS 1.3.

3. Incident Response

Any security anomaly triggers an immediate Emerald Stealth circuit-break, isolating the affected tenant node.
